

DWF-1 Automatic Double Loop Wire Forming Machine

**Advantages:**

Machine can prevent the silk material builds the link or ferrule, and can pull straight the nylon coated wire

Machine can process the nylon coated wire or galvanized wires, delivers through the conveyor to the second location

Machine is loaded with counter, carries on the statistics, may change the double loop wire conveniently the diameter

Double loop wire from 1/4" to 1-1/2" may use identical collector

Machine can produce from nylon coated wire and galvanized wire is general

**Specifications:**

Pitch 3:1 double loop wire diameter: 1/4" 5/16" 3/8" 7/16" 1/2" 9/16" 5/8"

Pitch 3:1 wire roll speed :400-650 loops/minutes

Pitch 2:1 double loop wire diameter :5/8" 3/4" 7/8" 1" 1-1/8" 1-1/4" 1-1/2"

Pitch 2:1 moving speed: 300-500 loops/minute

Machine Dimension: 4.5m x 1.6m x 1.8m

Power : 220v ,1 PH 50Hz; 0.75Kw

Weight :390Kg
